OBJECTIVE

MERN Stack Developer with expertise in MongoDB, Express.js, React.js, and Node.js, skilled in Next.js, PostgreSQL, and TypeScript, and actively exploring 3D web development with Three.js and blockchain integration with Web3.

PROJECTS

SpeakBuddy – MERN Language Learning App

[GitHub](#) | [Live Link](#)

- Built with **MongoDB, Express, React, Node, Tailwind CSS**; responsive UI with secure **JWT authentication**.
- Managed state with **Zustand** (client) & **React Query** (server), ensuring smooth API caching and data flow.
- Integrated **real-time chat & video calls (Stream SDK)**, enabling interactive language learning experiences.

Converso — AI SaaS Platform

[GitHub](#) | [Live Link](#)

- Developed a scalable AI SaaS platform using Next.js, TypeScript, and Tailwind CSS for a modern, responsive user interface.
- Integrated Clerk for secure user authentication, Supabase for real-time backend services, and Vapi for advanced AI voice interactions.
- Enhanced with Sentry for error tracking and performance monitoring to ensure a reliable, production-ready experience.

CineBuzz- Full Stack Movie App

[GitHub](#) | [Live Link](#)

- Built with **React.js, Tailwind CSS**, and **Appwrite**, featuring a sleek UI and fully responsive design.
- Implemented optimized search with **debouncing** and a custom algorithm to display trending movies based on user behavior.
- Integrated **TMDB API** to fetch real-time movie data (currently functional on Airtel networks) and enhanced the user experience with dynamic movie discovery.

iPhone 15 Clone

[GitHub](#) | [Live Link](#)

- Created a clone of Apple's iPhone 15 website using **React, Tailwind CSS, Three.js**, and **Vite**.
- Implemented 3D models of iPhone 15 and 15 Pro using **React Three Fiber** and **React Three Drei**.
- Added smooth animations to enhance interactivity and deliver a visually stunning user experience.
